

PS2 AI tutoring session report

Fill every field. Quoted excerpts must be verbatim from your chat (copy and paste; do not paraphrase).
Save as `ai_session_report_PS2-<problem number>.md`.

Header

- Problem: PS2 problem ____ (5, 6, 7 or 8)
- Tool: Microsoft Copilot, agent "PHY240 PS2"
- Model as reported by Copilot (or "not reported"):
- Date of session:
- Total time spent (minutes):
- Number of your turns:
- Did you click any of Copilot's suggested replies? (no / yes: which)

1. Pre-session attempt

Paste or attach your attempt as it was before the session started. One line: where you stopped and why.

2. Initiate and redirect

- Your opening prompt, verbatim:
- One moment where you redirected the tutor (it started solving, drifted off the problem, or changed method), quoted verbatim with your response. If this never happened, say so and quote the exchange where the tutor came closest.
- Why you redirected:

3. Mindful adoption

- One hint you accepted, quoted verbatim. Why you accepted it:
- One hint you rejected, quoted verbatim. Why you rejected it:

4. External help-seeking

- The claim you checked, quoted verbatim:
- Source you checked it against (lecture notes section, textbook and page, or person):
- Outcome (claim correct / incorrect / partly; one sentence):

5. Comparison

- Tutor's final solution: paste it, or attach.

- Differences from your attempt, numbered. For each: what differed, who was right, how you decided.

6. Co-created variant

- The variant problem as the tutor stated it:
- Your attempt:
- Fair test? (yes / no, one sentence on why)

7. Reflection

- At most three sentences: what changed in your understanding of the problem.
- One sentence: what the tutor got wrong or did unhelpfully.
